WIRELESS BUILDING CONTROL SYSTEMS

NEXTGEN SYSTEM PROVISIONING

Today's wireless building control systems and LED lighting technologies are leading the way in driving operational efficiencies and energy cost reductions. The challenge now faced by building owners and facility managers is ensuring the seamless integration, setup, and maintenance of these newly connected technologies.

Often considered to be a complicated, time-consuming, and downright stressful task, system provisioning has always posed a challenge for those wishing to leverage the power of the Internet of Things (IoT).

Building on over twelve years of system configuration experience - in over 50 million square feet of commercial spaces - SBT Alliance and our internal division Glued Solution (GSI), reduce the stress and complexity of smart system deployments.

SMARTER SPACES. MADE EASY.

Less Complexity: SBT's Glued Solutions division takes on the responsibility for all system design and review, IoT backbone requirements, device configuration, system start-up, verification, and ongoing maintenance.

Streamlined Setup: Glued Solutions has developed proprietary procedures and tools to more efficiently configure wireless IoT systems.

Strategy Coaching: Glued Solutions technology engineers work one-on-one with clients to ensure their device control strategies are in line with their operational and business goals.

Mesh Networking Expertise: SBT's GSI division has over twelve years of wireless mesh networking controls experience to assist clients in evaluating advanced controls solutions from our IoT Controls Ecosystem.

Quicker Deployment: Our NEXTGEN system provisioning and setup processes allow for quicker system deployments over traditional system integrators.

Ongoing Maintenance: SBT Alliance and Glued Solutions ensure system stability, performance, and current ROI long into the future, through cutting-edge technology support.

WHAT MAKES SBT & GSI DIFFERENT?

As an industry leader since 2006, Glued Solutions has pioneered new innovative ways - and technology tools - to deploy today's leading wireless control systems. Backed by our intimate understanding of networked wireless controls and extensive field experiences, GSI has the unparalleled expertise required to successfully even the most sophisticated IoT solutions.

DEPLOYING IOT SOLUTIONS AT SCALE

As an industry leader, our system setup and configuration services are backed by our experience gained from over 500 system deployments in over 50 million square feet of commercial spaces.

ADVANCED SYSTEM SUPPORT

Through GSI's back-end programming capabilities and innovative SUPPORTHUB tablet, we're able to provide clients with enhanced deployment assistance, troubleshooting, system verification, and custom application services not typically available from other system integrators.

POST-INSTALL SUPPORT

Included in every networked controls system deployment, we provide our end-user clients with advanced system and technology support to ensure your devices continue to run at peak performance long into the future.
